VOLUME CONTENTS

Number 1

J. P. Meijaard and A. D. de Pater	1	Railway vehicle systems dynamics and chaotic vibrations
P. V. Ranganathan	19	A direct procedure for deriving the invariants of certain non-linear dynamical systems
K. A. Ames	29	Group properties of a one-dimensional system of equations for wave propagation in various media
S. W. Shaw and R. H. Rand	41	The transition to chaos in a simple mechanical system
A. Ravasoo	57	Propagation of non-linear waves in inhomogeneous hereditary media
M. F. Beatty	65	Stability of a body supported by a simple vehicular shear suspension system
	I	Software Survey Section

Number 2

C. Pezeshki and E. H. Dowell	79	Generation and analysis of Lyapunov exponents for the buckled beam
D. Fusco and N. Manganaro	99	Linearization of a hyperbolic model for non-linear heat conduction through hodograph-like and Bäcklund transformations
L. D. Zavodney and A. H. Nayfeh	105	The non-linear response of a slender beam carrying a lumped mass to a principal parametric excitation: theory and experiment
K. H. Lee, N. R. Senthilnathan, S. P. Lim and S. T. Chow	127	A simple higher-order non-linear shear deformation plate theory
A. H. Nayfeh and P. F. Pai	139	Non-linear non-planar parametric responses of an inextensional beam
	I	Software Survey Section

Number 3

R. Bhattacharya and B. Banerjee	159	Influences of large amplitudes, transverse shear deformation and rotatory inertia on free lateral vibrations of transversely isotropic plates—a new approach

Liu Ren-huai and Li dong 165 On the non-linear bending and vibration of corrugated circular plates

J. V. Pereira 177 State equation for an ensemble of self-oscillating systems in interaction

N. Sri Namchchivaya 185 Non-linear dynamics of supported pipe conveying pulsating fluid—I. Subharmonic resonance

N. Sri Namchchivaya and W. M. Tien 197 Non-linear dynamics of supported pipe conveying pulsating fluid—II. Combination resonance

L. E. Payne and B. Straughan 209 Comparison of viscous flows backward in time with small data

B. S. Dandapat and A. S. Gupta 215 Flow and heat transfer in a viscoelastic fluid over a stretching sheet

M. Massoudi and M. Ramezan 221 Effect of injection or suction on the Falkner–Skan flows of second grade fluids

C. Rogers and U. Ramgulam 229 A non-linear superposition principle and Lie group invariance: application in rotating shallow water theory

L. A. Taber 237 Comparison of elasticity and shell theory results for large deformation of rubberlike shells

Number 4

M. V. Gandhi and M. Usman 251 On the non-homogeneous finite swelling of a non-linearly elastic cylinder with a rigid core

C. G. A. van der Beek 263 Normal forms and periodic solutions in the theory of non-linear oscillations. Existence and asymptotic theory

J. Shaw, S. W. Shaw and A. G. Haddow 281 On the response of the non-linear vibration absorber

D. E. Panayotounakos 295 Non-linear and buckling analysis of bars lying on an elastic foundation

A. K. Dacko and P. G. Glockner 309 Behaviour of spherical pneumatics subjected to axisymmetric ring loads

H. Flashner and R. S. Guttalu 327 Analysis of non-linear non-autonomous systems by truncated point mappings

J. Irons and W. Kennedy 345 Non-linear vibration of centrally clamped thin discs

I Software Survey Section

Number 5

Salah E. Mohamed and G. J. Simitses	353	Buckling of flexibly-connected gabled frames
Y. M. Fu and C. Y. Chia	365	Multi-mode non-linear vibration and post-buckling of anti-symmetric imperfect angle-ply cylindrical thick panels
M. Iga and J. N. Reddy	383	Penalty finite element analysis of free surface flows of power-law fluids
M. F. Beatty and R. Bhattacharyya	401	Stability of the free vibrational motion of a vehicular body supported by rubber shear mountings with quadratic response
A. Jeffrey and H. H. Dai	415	On the weak oblique reflection of solitary waves at a slope
A. Jeffrey and Siqing Xu	425	Travelling wave solutions to certain non-linear evolution equations
K. V. Pramod, N. Nirmala, M. J. Vedan and S. Yu. Sakovich	431	Integrability study and numerical analysis of a Korteweg–de Vries equation with variable coefficients
M. Torrisi	441	Similarity solutions and growth of weak discontinuities in a non-constant state for a reactive polytropic gas
M. C. Patria	451	Stability questions for a third-grade fluid in exterior domains
D. N. Riahi	459	Non-linear convection in a porous layer with permeable boundaries
	465	Announcements
	I	Software Survey Section

Number 6

R. Bhattacharyya	467	Stability of the forced vibrational motion of a vehicular body supported by rubber shear mountings with quadratic response
A. H. Nayfeh and N. E. Sanchez	483	Bifurcations in a forced softening Duffing oscillator
M. J. Mikkola	499	Complementary energy theorem in geometrically non-linear structural problems
E. Pucci	509	Acceleration waves in a two-phase solid–gas flow
M. Negahban and A. S. Wineman	521	Material symmetry and the evolution of anisotropies in a simple material—I. Change of reference configuration

M. Negahban and A. S. Wineman 537 Material symmetry and the evolution of anisotropies in a simple material—II. The evolution of material symmetry

Yeh Kai-yuan, Zheng Xiao-jing and Zhou You-he 551 An analytical formula of the exact solution to von Kármán's equations of a circular plate under a concentrated load

P. Bourgin and J. A. Tichy 561 The effect of an additional boundary condition on the plane creeping flow of a second-order fluid

A. Paglietti 571 Thermodynamic nature and control of the elastic limit in solids

H. Ramkissoon, C. V. Easwaran and S. R. Majumdar 585 Unsteady flow of an elastico-viscous fluid in tubes of uniform cross-section

I Software Survey Section
